FOR IMMEDIATE RELEASE

CLUB CAR CONTINUES TO OUTPACE UTV INDUSTRY

Utility Vehicle Manufacturer offers broadest portfolio in market

AUGUSTA, GA (July '08) – Club Car introduces the XRT950 series to the market this month, broadening their consumer utility vehicle lineup even further. The addition of three full-featured, compact UTVs brings the company's tally to three "series" and 9 current base models- offering the most premium utility vehicles in every class.

XRT800 Series: XRT800, XRT810 and XRT850

The compact XRT800 series vehicles haul almost anything around the home, farm or lake. And, thanks to their compact size, the vehicles fit easily in the back of a normal size pick-up truck and navigate narrow spaces without a second thought. No other vehicles in this class have better range, better features or a better warranty.

An aircraft-grade aluminum frame and a dent resistant, chemical resistant, plastic bed box are just a few standard features users can expect. The choice of an electric powertrain on the 800 model is also an industry-exclusive to this series.

XRT900 Series: XRT950 4x2, XRT950 4x4 and XRT950 EX

The newest series to join the XRT family, these vehicles are packed full of premium features and technology, setting a higher standard in the compact utility vehicle market.

The new series is made up of three powerful, premium vehicles featuring a 14HP Vanguard™ Engine- the only V-twin engine on the market in the compact class offering 20% more displacement than the competition. Other first-in-class features include: independent rear suspension, tons of passenger room and creature comforts like extra large cup holders, big storage compartments, and retractable seatbelts.

At the top of the series is the XRT950 EX. An incredible value for the money this model comes standard with the industry's only Jeep-style enclosure. Manufactured by Bestop, makers of enclosures for the JEEP® brand, these enclosures protect users from all elements – rain, sleet or snow. Users can remove/add the top, back and side doors fast and easy for any type of environment.

XRT1500 Series: XRT1550, XRT1550 SE and XRT1550 IntelliTach

The strongest, most desirable full-size luxury utility vehicle on the market, the XRT1550 series are engineered with premium technologies, components and styling.

On the inside, the XRT1500 series vehicles are equipped with premium technologies like a fully independent front suspension, automotive-style 4-wheel hydraulic disc brakes and Club Car's exclusive IntelliTrak™ technology, the industry's first/only automatic, true all-wheel-drive system.

On the outside, the XRT1500 series are constructed with a rustproof, non-corrosive, lightweight, aircraft-grade 6061 aluminum frame— the same grade aluminum used in F-16's and racecars to ensure a long lifespan. With an automotive-stylized grill, rounded hood and heavy-duty side panels, the vehicles' looks are leaner and sleeker and it's tougher too.

To maximize comfort, Club Car gives owners the option of selecting bucket or bench seats, and the SE version offers four forward facing seats without sacrificing bed box size.

Club Car also corners the “workhorse” market with their exclusive IntelliTach system – the only fully hydraulic-powered, quick-changing tool attachment system in the industry. The IntelliTach model is also available with a diesel engine.

Club Car's nationwide dealer network provides support and advice to users across the country. For more information, consumers can visit their local Club Car XRT Dealer. To locate a dealer and learn more about the XRT Series, contact us, or visit www.clubcar.com.
