FOR IMMEDIATE RELEASE

CLUB CAR PARTNERS WITH BESTOP

AUGUSTA, GA (July '08) – Club Car recently established a relationship with Broomfield, Colorado-based Bestop®, Inc. to “top” a new series of utility vehicles the manufacturer is introducing to consumers this fall. Known best for their premier JEEP® enclosures and accessories, Bestop will provide full cab enclosures for Club Car’s XRT900 series.

“When we began designing the XRT950, Bestop was the only choice in our minds for enclosures,” said Tim Amos, Project Manager, Club Car. “We wanted to offer our customers a rugged utility vehicle with premium features that would stand up to any environment. Bestop has proven that their products can withstand anything Mother Nature throws their way.”

The XRT950’s cab enclosure includes a hard molded canopy, soft, wire-framed rear curtain and two-piece soft doors. The soft pieces feature Bestop’s unsurpassed appearance and durability with premium fabric that maintains its shape in any temperature, is mildew-resistant and contain UV-inhibitors.

Similar to the widely recognized JEEP enclosure, the XRT950 enclosure not only looks good, but is also ready to take on the elements. The cab system creates an enclosed environment, allowing users to drive through mud, rain and snow without ever feeling the effects.

“Bestop enclosures have been protecting JEEP drivers for 50 years and the UTV market is the next natural extension for our brand,” said Ken Holbrook, VP of Sales and Marketing, Bestop. “We’re honored to work with such an established company as Club Car and look forward to what the future holds.”
